Dear Commissioner Henney,

I have read recently that many medically useful antibiotics are being added to animal feed. What this is doing is making bacteria resistant to those antibiotics. And that will mean that we human beings will be at risk in life-threatening situations.

A petition as been filed by the Center for Science in the Public Interest to ban these antibiotics in animal feed. Please support this petition. Thank you.,

Sincerely,

*Don Paulsen*

PS Please let me know what you decide about the ban.

*Dr*
